

A cross-sectional view of a substrate 10. The substrate 10 has a bottom surface 11 and a top surface 12. A layer 13 is formed on the top surface 12, featuring a series of circular protrusions. Each protrusion has a top surface 31 and a side surface 32. The layer 13 is shown with a wavy bottom edge. Above the layer 13, there are several small circles representing particles or droplets, some of which are labeled 32. The top surface 12 is indicated by a horizontal line at the top of the substrate.
